

I.S.Rivers 2022 – 4th international conference
Integrative sciences and sustainable development of rivers
From 4 to 8 July, 2022 in Lyon (France)

Following the success of I.S.Rivers 2012, 2015 and 2018, the **GRAIE and ZABR are launching the fourth edition of I.S.Rivers in 2022**, international focuses on research and actions in the service of rivers and large rivers, whether natural or highly anthropized.

Promote multidisciplinary approaches, engage all stakeholders and build links

The aim of this international conference is to share research and experiences among scientists and water stakeholders to improve practices for a sustainable management of large rivers. Particular consideration is given to the integration of physical, ecological and social perspectives of the different stakeholders involved in river management (governance, economy, culture).

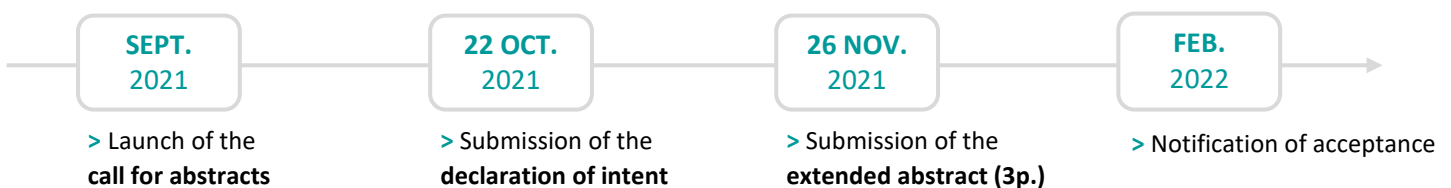

The main themes for 2022:

TRAJECTORIES AND ADAPTATION TO GLOBAL CHANGE > Co-evolution of rivers and society

RIVER FUNCTIONING, QUALITY AND SERVICE > From bio-indication to river good status

ECOLOGICAL RESTORATION AND MANAGEMENT ISSUES > Feasibility, evaluation, strengths and policy issues

RIVERS AND HUMAN IN INTERACTION > Perception, governance, values, fair management

I.S.Rivers: a unique occasion in Europe to...

- Provide an overview of worldwide river management and restoration practices;
- Discover the most recent developments regarding knowledge, methodology and decision support tools, integrating research results, for a sustainable management of rivers.

Key figures of I.S.Rivers 2018:

- 525** participants (scientists, local authorities, consultants) from **29** countries
- 2 ½** days of conference
- 73** rivers represented
- + 230** oral and poster presentations
- 4** technical tours
- 3** specialised workshops
